

KUMARI MAHIMA

Senior Software Engineer (Backend) | Java | Kotlin | Spring Boot | Microservices | Distributed Systems
kmahima1196@gmail.com | +91 8871033051 | [linkedin.com/in/kumarimahima11](https://www.linkedin.com/in/kumarimahima11) | github.com/mahimak1110

Open to relocation to Europe | Germany Opportunity Card holder

PROFESSIONAL SUMMARY

Senior Software Engineer (Backend) with 7+ years of experience designing and operating production-grade Java and Kotlin microservices, event-driven systems, and secure REST APIs. Expertise in fintech and regulated environments, Kafka-based architectures, and full production lifecycle including CI/CD, observability, and secure deployments.

TECHNICAL SKILLS

Core Java: Java (8/11/21/25) — multithreaded development, synchronization patterns, JVM tuning, memory management

Spring Framework: Spring Boot, Spring MVC, Spring Cloud, Hibernate, JPA

Architecture: Microservices, Distributed Real-Time Systems, Event-Driven Architecture, CQRS, REST APIs, Web-Socket, API Design & Versioning, Data Scalability

Messaging & Events: Apache Kafka (DLQ, retries, replayability), Azure Service Bus, RabbitMQ

Databases: Oracle, Redis, PostgreSQL, MySQL, MongoDB — SQL & NoSQL

Containerisation: Docker, Kubernetes

Cloud: AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP (familiar, actively upskilling)

CI/CD & DevOps: Jenkins, Azure DevOps, TeamCity, Git, Maven, Gradle

Observability: Datadog, Splunk, ELK Stack, APM, distributed tracing, alerting

Testing: JUnit, Mockito, Integration Testing, TDD

Other: Postman, Swagger/OpenAPI, JSON, XML, Jira, Confluence, Agile/Scrum, SAgE, GitHub Copilot

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Sep 2025 – Present

Deloitte Consulting

Client: Mercedes-Benz R&D India — Automotive Certification Platform

- Architected and built cloud-native Kotlin/Spring Boot microservices forming core backend of an automotive certification platform, processing 10,000+ requests monthly with zero production-critical failures.
- Designed secure, versioned REST APIs supporting ECU hardware and software validation, built for data scalability and 100% regulatory compliance across multiple vehicle production lines.
- Owned end-to-end Kubernetes deployments, CI/CD pipelines via Azure DevOps, Docker containerisation, and infrastructure-as-code following distributed systems best practices.
- Implemented full observability stack: metrics, structured logging, and alerting for real-time production incident response.
- Mentored and supported mid-to-senior engineers, coordinated team delivery, and worked closely with Tech Leads and Product Owners to drive technical execution and resolve dependencies.
- **Stack:** Kotlin, Spring Boot, Microservices, REST APIs, PostgreSQL, Azure DevOps, Docker, Kubernetes.

Java Backend Engineer

Apr 2024 – Sep 2025

IBS Software Services

Client: Expedia Group — Checkout & Search Microservices

- Developed and maintained Core Java/Spring Boot backend services powering Checkout and Search flows for 10M+ daily users — a high-throughput, low-latency system handling real financial transactions.
- Built Kafka-based event-driven, multithreaded workflows with dead-letter queues, retries, and replayability, maximising data scalability and async processing reliability across distributed infrastructure.
- Identified and resolved latency bottlenecks using Datadog and Splunk, reducing p95 API latency by 25% through targeted performance optimisation.
- Increased automated test coverage to 90%, reducing regression risk on critical payment paths.
- **Stack:** Java, Spring Boot, Kafka, REST APIs, MySQL, Jenkins, Datadog, Splunk.

Java Backend Engineer

Sep 2021 – Mar 2024

IBS Software Services

Client: Expedia Group — Conversational AI Platform

- Built RESTful APIs using Spring Boot for a conversational AI chatbot serving 2M monthly customer interactions at 90% automation rate — a high-throughput system with strict latency requirements.

- Optimised SQL database queries and caching with Redis, cutting API response time by 35% (800ms → 520ms), directly improving SLA adherence across distributed teams.
- Designed microservices with clear domain boundaries and independent deployment, supporting data scalability and horizontal scalability under peak load.
- Worked with distributed teams across the US, Europe, and India — strong English communication across time zones.
- **Stack:** Java, Spring Boot, MySQL, Redis, Docker, Microservices.

Java Developer

2018 – 2021

Tata Consultancy Services

Client: Deutsche Bank — Fraud Detection & Transaction Monitoring

- Developed Core Java backend services for fraud detection and financial transaction monitoring at a major investment bank processing 75,000 transactions daily under European financial regulations.
- Applied multi-threaded development and synchronization patterns with deep JVM tuning to improve system stability by 30% and reduce production incidents.
- Reduced build time by 40% via CI/CD pipeline optimisation.
- Resolved 100% of critical security vulnerabilities, ensuring regulatory compliance.
- **Stack:** Java, Spring MVC, Hibernate, Oracle Database, TeamCity.

PROJECTS

Travel AI Assistant

github.com/mahimak1110/travel-ai-assistant

Self-directed project

- Built a full-stack AI travel planning assistant with conversational trip recommendations, integrating a local LLM (Ollama + Qwen) via LangChain4j for natural-language interaction and persistent conversation memory in PostgreSQL.
- **Stack:** Java 21, Spring Boot, LangChain4j, Ollama, Qwen, PostgreSQL, React, Vite.

EDUCATION

Bachelor of Engineering — Computer Science

2018

Rungta College of Engineering & Technology, Bhilai, India

CERTIFICATIONS

- AWS Cloud Practitioner Essentials — Amazon Web Services (2024)
- SAFe 6 Practitioner — Scaled Agile (2025)

ADDITIONAL INFORMATION

Languages: English (Fluent), Hindi (Native), German (A1 — actively learning)

Relocation: Open to relocation to EU as a German Opportunity Card holder; open to relocation support packages.

Recognition: Spot Award — Mercedes-Benz (2026) | Team Player Award — Expedia Group (2023) | Department Champ Award — IBS Software (2023) | Team Award — IBS Software (2022)
